🐙 <https://github.com/RahulDev-01>

Motivated and detail-oriented developer with experience building modern web applications, scalable backend systems, and intelligent automation features. Adept at designing end-to-end solutions that combine strong application logic, data-driven workflows, and cloud-based deployment practices. Passionate about creating reliable, efficient, and user-centered digital products while continuously adapting to emerging technologies. Committed to writing clean, maintainable code and contributing effectively to high-impact engineering teams.

WORK EXPERIENCE

Full Stack Developer

🏢 Unified Mentor

📅 Jul 2025 - Oct 2025 Remote

Integrated external services and APIs to enhance application functionality, improve performance, and elevate overall user experience. Collaborated with functional teams to gather requirements, resolve technical challenges, and support the successful deployment of web applications into production environments.

PROJECTS

SwiftResumeAI | AI Resume Builder

🔗 <https://swift-resume-ai-2.vercel.app/>

Developed an AI-powered Resume Builder utilizes intelligent algorithms to analyze job descriptions and provide personalized resume and provide suggestions, ensuring alignment with industry standards and best practices.

Portfolio

🔗 <https://savvana-rahul.tech>

A professional portfolio showcasing my skills, projects, achievements as a Full Stack Developer. It features responsive, user-friendly design and serves as a platform to demonstrate my work with interactive features, detailed project descriptions, and technical expertise.

Destin AI | AI Travel Planner

🔗 <https://destinai-rahul.vercel.app/>

Destin-Ai is an intelligent web application designed to streamline and elevate the travel planning experience by automating destination research, itinerary creation, and trip organization. The platform analyzes user inputs such as location, budget, and duration .
